

5 Minuten fürs Klima

**Planet Earth
Job Offer**

Hi!
Yes, it's me –
the one you've been
dealing with all the
time

OK, let me explain...

Are you asking why?

It is
climate regulation!

And hey, do you
know what's my favorite
service?

Have you ever
reflected on my
ecosystem services?

But this time
I can do it on
my own.

Usually it is
your lecturers ...

... who suddenly
spend
5 minutes ...

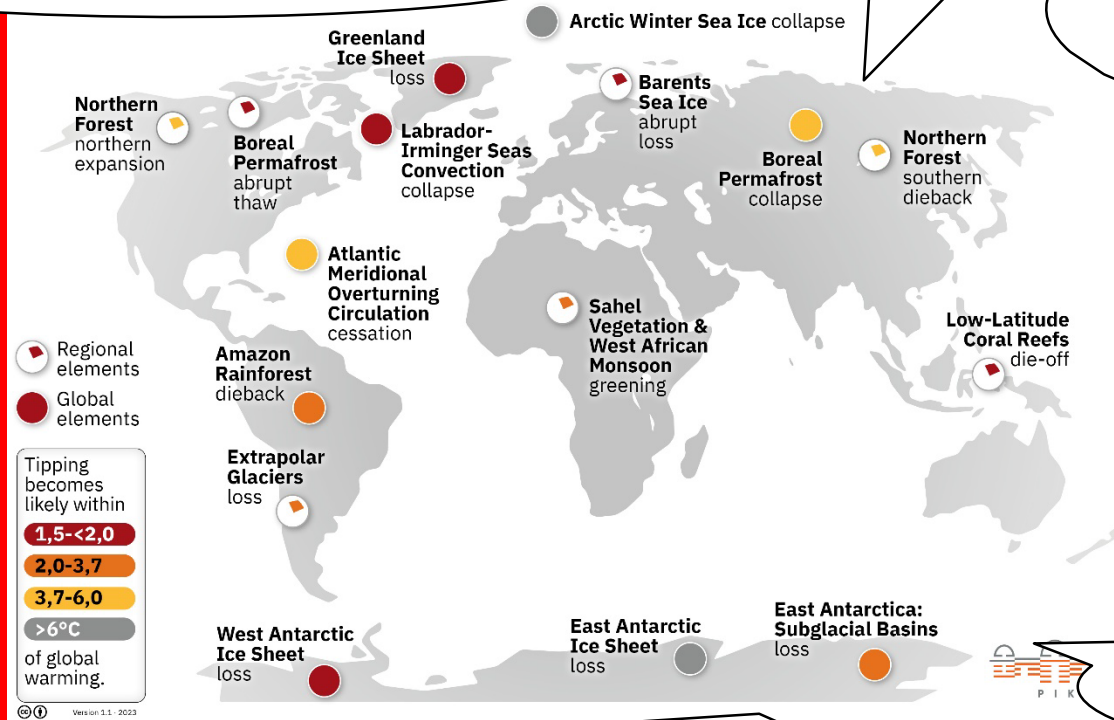

in order to
appreciate
climate protection

They will lose their regulating function when we reach 1.5 °C or more

See my vulnerable elements

My climate system is extremely complex

... because of my position in the solar system, the involved biogeochemical processes, etc.

However, in the last 10,000 years I've managed to keep it under control

That's what I am really proud of!

But my climate system is extremely sensitive

... and vulnerable.

For example, do you know this?

Global warming of only 1.5 °C can destroy my well-balanced, sensitive climate system

... because important parts will lose their familiar properties, e.g. the greenland ice sheet and the boreal permafrost

Please apply ...

It's the best job
you can ever get

... a job offer

Therefore, I am making
you a friendly offer ...

... so I have to squeeze out
all groups that cannot cope
with my rules

I'm a highly integrated
organism ...

But, to be honest
– I also have to
warn you

And that's exactly
why I need ...

YOU!

YOU ALL!

Believe me,
I am serious

I fully trust in you

I have observed your
species since
300,000 years

I know what you humans
can achieve

It's probably more than
you think

EARTH

- No. 1 for life in the entire universe
- 4.6 billion years of success
- Leader in operating complex ecosystems

Humanity has been one of my innovation projects for 2 million years.
For project completion within the next 40 years I am seeking one billion

Earth Operations Managers

in the areas of civil society, politics, business, science, and individuals.

Your tasks:
